SOLUTIONS BRIEF

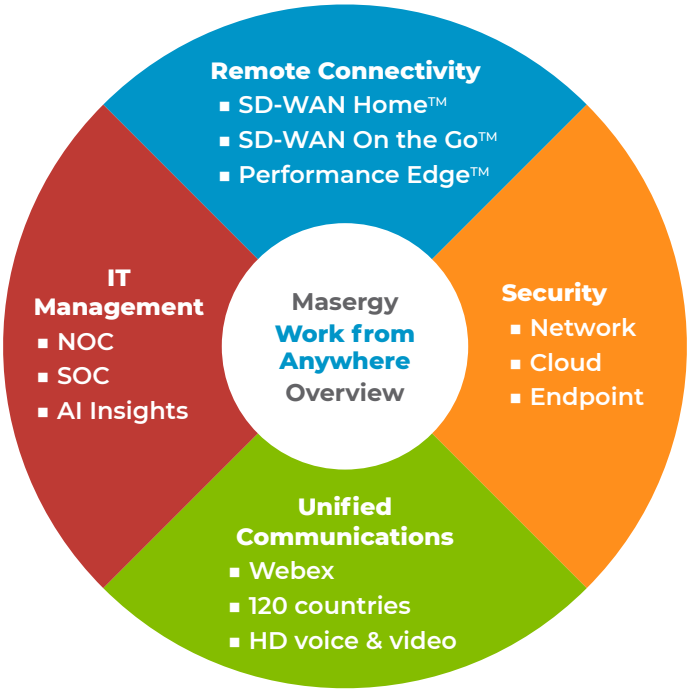
Masergy Work from Anywhere Solutions

Connectivity, security, and collaboration in one solution

The way business gets done has changed radically. IT departments now must support remote work as well as hybrid-work environments, where employees bounce between the office and home. Empowering your employees to get the job done securely and efficiently is easier with help from Masergy.

Masergy Work From Anywhere solutions go beyond legacy "work from home" systems that provide only virtual private network (VPN) software installed on a corporate-owned laptop. You get SD-WAN connectivity, comprehensive security capabilities, and enterprise collaboration applications all rolled into one turnkey managed service. Plus, Masergy connects and protects every device your employees use, no matter where they use it.

- Improve security for the distributed workforce
- Make the corporate network available anywhere
- Deliver superior collaboration experiences



Award-winning solutions

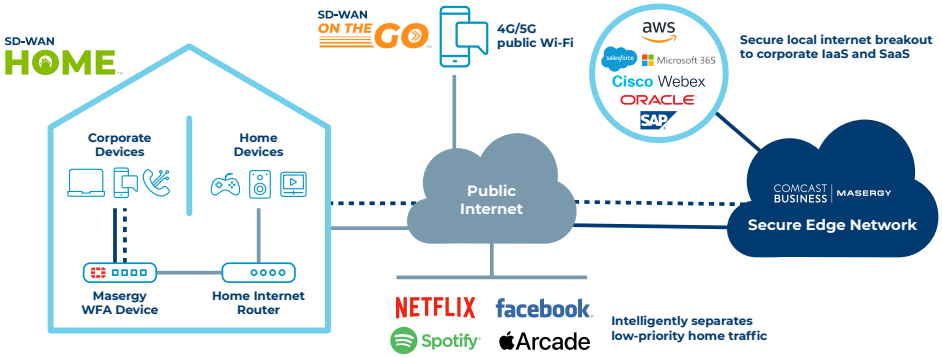
Remote connectivity: Your network is now available at home or anywhere



SD-WAN ON THE GO™

Need connectivity anywhere? **Masergy SD-WAN On the Go** enables secure remote access and is designed for knowledge workers using either corporate-owned or personal devices to connect to the corporate network and cloud applications. This software-only solution is the cost-effective way to connect employees working on any Windows®, Macintosh®, iOS®, Android®, and Linux® device.

- Securely connect employee-owned and corporate-owned devices to the network
- Establish secure access using VPNs with IPsec tunnels and next-gen endpoint protection
- Enable a SASE-based approach to security with location- and identity-based access as well as comprehensive threat detection and response services

PERFORMANCE EDGE™

With Masergy's Performance Edge, IT leaders can improve cloud application performance for employees using broadband and public internet services.

Learn More

SD-WAN HOME™

Designed for power users at home who require high-performance video conferencing and business application experiences, **Masergy SD-WAN Home** delivers a hardware-based solution. Powered by Fortinet, it allows you to instantly and securely extend the corporate WAN via any home internet modem.

- Improve cloud application performance for employees using their home internet service
- Enhance security by separating employee network activities from their family's internet usage
- Make security intrinsic to remote access—the Fortinet SD-WAN device includes integrated next-generation firewall, router, and secure WiFi

> **"Enterprises need scalable, distributed access from anywhere, to anywhere, with great performance. This new WAN backbone centers on SD-WAN and leverages its advantages everywhere."**

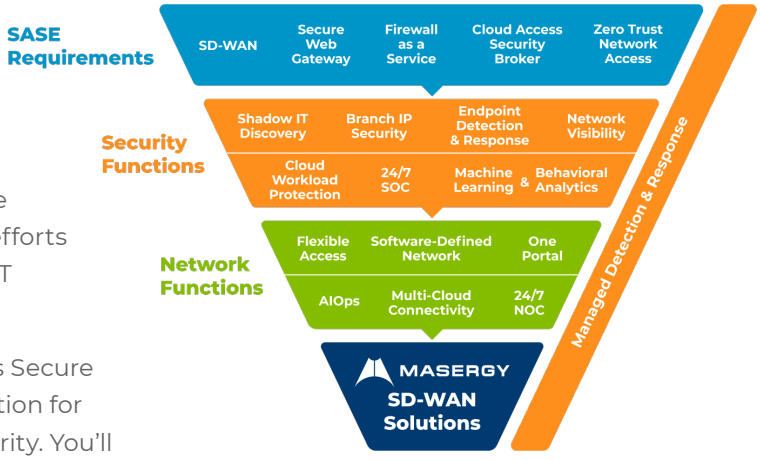
SASE: Security for the work-from-anywhere workforce



Today, business-critical applications are moving to the cloud, the network edge is expanding, and data is going everywhere users are. As a result, companies must refocus their security efforts around users, identities, and devices—all without increasing IT complexity.

Masergy Work From Anywhere solutions go beyond Gartner's Secure Access Security Edge (SASE) model, giving you a unified solution for SD-WAN, network security, cloud security, and endpoint security. You'll gain the confidence of cybersecurity technologies from leaders in their respective Gartner Magic Quadrants. Better still, your entire solution is monitored and managed 24/7 by Masergy's global security operations centers. This way, you can focus on building your business rather than worrying about daily security alerts.

- Hybrid next-gen firewalls and secure web gateway solutions
- CASB solutions + identity-based WAN analytics
- Endpoint detection and response services

Availability in 120 countries | **Webex with Masergy Voice** | **Secure Edge Network** | **Integrates with Microsoft Teams**

Collaboration: Empower teamwork everywhere

Delivering a consistent team collaboration experience can be challenging in a hybrid work environment where everyone is using different platforms and networks.

With Masergy, you can consolidate and simplify IT while protecting the user experience. Just bundle Webex® collaboration applications and IP phones (optional) with your SD-WAN solution. When Masergy UCaaS with Webex is delivered over our global software-defined network you can empower teams with high-performance VoIP, video, and collaboration experiences using a fully-managed service.

- Enterprise-grade collaboration services available in 120 countries
- The industry's best SLAs provide 100% in-sequence packet delivery Edge-to-Edge
- Cost savings for Microsoft® Teams calling plans—only pay for the concurrent call paths you need

One AI-powered portal gives you total control

Supporting a hybrid workforce requires real-time visibility and control, and Masergy Work From Anywhere solutions provide corporate IT managers with a unified "single pane of glass" administration portal for deep, immediate insights.

- Get a holistic view of performance with real-time metrics on endpoints, cloud services, and UCaaS applications—then scale bandwidth instantly
- Predict and prevent network and application outages using your virtual network assistant, Masergy AIOps
- Gain deeper security visibility with built-in identity-based WAN edge analytics and shadow IT discovery tools
